MANVI RANJAN

manvi.18259@stu.upes.ac.in | +91 8757645384 | LinkedIn | GitHub | Portfolio

PROFILE

Computer Science undergraduate (Cybersecurity specialization) at UPES with hands-on experience in Web Application Security (VAPT) and backend systems development in Java/Spring Boot. Strong foundation in networking, access-control mechanisms, and scalable system design.

EDUCATION

UPES Dehradun 2024 – 2028
B.Tech Computer Science (Cybersecurity) · CGPA: 8.87 / 10

Holy Mission Senior Secondary School (CBSE) 2023
Class XII · 90.4%

Carmel High School (ICSE) 2021
Class X · 88.4%

INTERNSHIP EXPERIENCE

Trihari Smart Solutions Jun 2026 – Jul 2026
Cybersecurity Intern (VAPT)

- Conducted hybrid black-box and grey-box security assessments on live state-level web applications within an authorized scope.
- Identified and documented 15+ vulnerabilities, including missing rate-limiting on admin login, session fixation, and clickjacking, using Burp Suite and OWASP ZAP.
- Performed manual parameter tampering in Burp Suite, verified scanner false positives, and delivered formal remediation reports.

Being Helper Foundation Jun 2025 – Aug 2025
Summer Intern

- Taught academic subjects and digital skills to underprivileged students in under-resourced environments
- Designed engaging learning activities to improve student participation.
- Strengthened communication, leadership, and adaptability skills working in low source environments.

PROJECTS

RateGuard: Distributed Rate-Limiting Engine *Java 17 · Spring Boot 3 · Redis · PostgreSQL*

- Engineering a distributed proxy to enforce API rate limits and eliminate check-then-act race conditions.
- Built the Spring Boot 3 service skeleton with REST endpoints and a client-registration API; filters and RFC 7807 errors in progress.
- Designing high-contention Token Bucket rate limiting executed via atomic Redis Lua scripts to guarantee thread safety.

Student Performance Analyzer *Python · Pandas · Matplotlib*

- Developed a data processing application using Python file handling and data structures for academic record analysis.
- Generated structured performance insights and visual distribution summaries from student academic datasets.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL

Security & Tools: Burp Suite, OWASP ZAP, Nmap, curl, Git, Postman

Web & Backend: Spring Boot, REST APIs, PostgreSQL, Redis, HTML, CSS

Core Concepts: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, OWASP Top 10

ACHIEVEMENTS & ACTIVITIES

- **Documentation, Creatives & PR Member —** Avishkarnam Literary Club, UPES (2024–2025)
- Volunteered in organising UKTI Literature Festival (2025) and Litcon Literary Event (2024)
- Built working model on Indore's Waste Management System for university sustainability fair
